

DOUG NEBERT WORKSHOP

**At The Treasury Theatre, Ground Level, 1 Macarthur St, Melbourne
9 June 2005, 1:00 - 5:00 pm**

GEOSPATIAL STANDARDS

– the critical ones for operationalising spatial data infrastructures –

Program

- 1:00 pm Registration
- 1:30 pm Opening – Bruce Thompson, Department of Sustainability and Environment
- 1:40 pm The role of Spatial Data Infrastructures and current progress in Australia : an introduction to geospatial standards – Steve Blake, ANZLIC
- 1:55 pm Keynote address – The now : priority geospatial and internet standards for implementing your SDI – Doug Nebert, US Federal Geographic Data Committee
- 2:50 pm Afternoon tea
- 3:15 pm The future : emerging geospatial standards : the ones to watch over the next 12-18 months – Doug Nebert, US Federal Geographic Data Committee
- 3:55 pm The current ANZLIC Metadata project – Jeff Dau, ANZLIC
- 4:05 pm Standards in action : case studies from host (and other) jurisdictions
- 4:35 pm Open discussion
- 5:00 pm Close

Topics to be covered include:

- Progress against the ANZLIC ASDI Action Plan
- Operationalising the ASDI through *Community of Practice* applications
- The roll out of standards-based products and applications in Australia
- The current geospatial standards “scene” — a brief introduction
- Update on the key *OGC* standards, *ISO TC211* standards, and relevant *WWWC* and *Oasis* standards in support of your SDI developments
- Update on Catalog Services and web services metadata
- Mainstreaming interoperability — learnings from the US *Geospatial One-Stop* project
- Progress on the *ANZLIC Metadata Project*
- Case studies of “best practice” in the jurisdictions. Recommendations from the recent SIDP Project by *OGC-A* and *ASIBA*
- Questions and answer session
